Approx. Shipping Weight (lbs)	1350	1375	1400	1500	1600	1700	1800	1900	2050
Throughput Capacity (tons/hr)*	1-2	2-4	3-5	4-6	8-16	9-18	10-20	11-22	12-24

\* Capacities are based on an average of common products. Actual capacities vary because they are dependent on the characteristics of the product as well as screen perforation size and shape. All Dimensions are inches.

Snappy Air finishers are used for high-intensity screening, cleaning and/or sifting – and are enhanced by aspiration. Nine models are available with single, double or triple deck configurations. Screening capacities range up to 24 tons per hour and 3,200 CFM.

### Authentic Metal & Ball Screen Frames Available

The constant ball agitation aids particle stratification and prevents screen blinding for more efficient cleaning, even when used with materials which tend to clog easily. Metal frames provide for a durable, long lasting life.

### Barbeau Drive Provides Years of Reliable Operation

The heart of the Air Finisher is our **Barbeau oscillating, eccentricless drive** which controls vigorous, yet smooth screen action that maintains production efficiency.

### Features & Benefits

- High Quality & Heavy-Duty Construction
- Superior Cleaning at an Economical Price
- Lower Power Consumption
- Single Suction Aspiration
- Superior screening capabilities – enhanced by aspiration of light weight materials and dust.
- Low maintenance, low horsepower.
- Easily removable screens.
- Ball screen option aids particle stratification for more efficient cleaning.
- Custom perforations or wire mesh screens available.
- High-quality and heavy-duty construction.
- Available in open, covered or totally-enclosed models for use outdoors or in dust-free environments.
